French Pink Clay

French pink clay is considered one of the gentlest clays. Natural, rich in minerals, and very gentle on the skin. It has a light, velvety texture and deeply restorative properties that nourish the skin with essential nutrients. Renowned for its gentle exfoliating action, French pink clay promotes cell regeneration and helps even out skin tone. Its natural anti-inflammatory properties soothe irritation and redness, making it ideal for sensitive skin.

Its smooth, fine texture blends easily with water or other ingredients to create a creamy paste for masks or scrubs. It is also used in various skincare products such as soaps and lotions.

Beyond skincare, French pink clay benefits hair and scalp health by detoxifying and gently removing impurities and excess oil without stripping natural moisture. It revitalizes the scalp, promotes healthy hair growth, and leaves hair feeling fresh and light.

Ideal for sensitive, mature, or dry skin, French pink clay promotes a healthy, radiant complexion without stripping natural oils. Use it in your masks, soaps, or body treatments for a spa-like experience at home. Revitalize your skin with the softness of our French pink clay, a naturally creamy clay known for its soothing and purifying properties.

French Pink Clay Is Ideal for making:

- soap
- bath bombs
- body products
- creams and lotions
- and much more...
- face masks
- scrub
- face and skin care
- hair care

Utilizations

Bath Bombs :

Clay per 454g of bath bomb mix:

0.5g French pink clay

Soaps :

Melt and pour soap: Clay mix per 454g of soap base:

1.5g French pink clay

15ml isopropyl alcohol 99%

Cold and hot saponified soap: Clay mix per 454g of soap base:

3g of French pink clay

30ml distilled water

As a mask:

Put French pink clay in a non-metallic dish, pour lukewarm water, stir until you get a creamy consistency, apply to your skin and leave on for 5-20 minutes, rinse and pat dry.

As a hair mask:

Combine 1 cup of French pink clay with ½ cup of liquid (water, aloe vera juice, etc..) and a moisturizing oil such as coconut oil. Mix everything together to create a paste and apply it to your damp hair from root to top. Leave it on for 20-40 minutes and rinse well with clean warm water.

Recommendations

The dosage suggested above is for information only; more or less can be used according to your recipes.

We suggest you always carry out final tests with your products.

The clay must be mixed with water before being added to the soap, both in cold and hot processes.

This extra water in your soap will help blend the clay into the soap and also prevent the clay from cracking.

More or less clay can be added to your soap bases to achieve the desired color.

This clay is a light pink powder and will give your soaps a beautiful shade of pink, depending on the color of your oils. Can be used at a rate of 5 – 100% in skin care products

This product is not intended to prevent, diagnose, treat, or cure any disease.

For external use only. Our clays are intended for cosmetic purposes.

Under no circumstances do we recommend that they be considered food or for medicinal or medical applications.

Store this product in a dry place away from direct sunlight.

Store it in an airtight container.

Never use a wet or damp spoon or any other utensil to handle or remove the powder from its container.

Avoid metal instruments and dishes to prevent any reaction with the clay.

Keep the clay away from moisture
